Astrophysicist working at the forefront of the studies of massive stars and binaries at low metallicity. Specialized in spectroscopic analysis and stellar evolution. Expert in the modern non-LTE model stellar atmosphere code PoWR and the stellar evolution code MESA. Principle investigator of three pioneering ESO VLT programs, hunting for post-interaction massive binaries in low metallicity galaxies, and co-PI on several HST, JWST and ESO VLT programs. Experience in undergraduate teaching, lecturing and public outreach.

Academic career

10/2024 - 09/2027 KU Leuven	Independent fellowship (FWO) 'Revolutionizing spectral synthesis: From isolated massive stars to unresolved stellar populations in the Early Universe'
10/2020 - 09/2024 University of Potsdam	PhD (astrophysics) grade: summa cum laude 'Unraveling massive star and binary physics in the nearby low-metallicity galaxy, the Small Magellanic Cloud, as a proxy for high-redshift galaxies' supervisor: Lidia Oskinova
10/2018 - 10/2020 University of Bonn	Master of Science (astrophysics) grade: 1.3 (95/100) 'The Evolution of Very Massive Binary Systems' supervisor: Norbert Langer
10/2015 - 10/2018 University of Bonn	Bachelor of Science (physics) grade: 2.4 (77/100) 'Investigation of the galactic WNE stars' supervisor: Norbert Langer
